

ASHABHUMI ONGOING JOURNEY

Ashabhumi greenhouse Nursery project

Ashabhumi Nepal distributed fruits trees in the community

Ashabhumi Nepal has started distributing different fruits trees and providing support to the community through the Greenhouse Nursery which was established. With the onset of the monsoon season, we have provided each family in the community with fruit trees to plant on their land.

Currently, we had a limited number of tree saplings, but we are committed to growing more and distributing them for planting on barren land. We are actively gathering resources to increase the number of saplings we can provide, ensuring greater support for our communities soon. Our goal is to enhance local biodiversity and promote sustainable land use, benefiting both the environment and community livelihoods.

Ashabhumi founder completes International Permaculture Design Course

To empower our community through sustainable agriculture practice, our founder recently attended a 15-day International Permaculture Design Course at the HASERA Agricultural Research and Learning Center with 13 participants from various countries.

The course provided an invaluable opportunity to delve into critical issues such as soil management and rejuvenation, natural pest control, composting, and water recharge and harvesting techniques, and companion plantation.

The training not only enhanced our understanding of local biodiversity but also facilitated the exchange of best practices across different countries. This knowledge will now be applied and shared within our community, with plans to conduct training sessions to empower these techniques among local farmers.

By transforming into organic practices, we aim to serve the rural communities of farmers to counter the problems they face and improve rural livelihood as well as the productivity of our community.

Ashabhumi Nepal got officially registered

We are excited to share that Ashabhumi Nepal has officially been registered in Nepal as a company not disturbing profit dedicated to uplifting farmers through training, support, incentives, and community empowerment. We also aim to brand local produce to ensure fairer prices for our farmers.

What's Next, Organic farming training in the community

We are excited to announce an upcoming organic farming training program aimed at empowering youth and farmers in our community. This initiative will provide essential training and support to promote sustainable agricultural practices. We are currently gathering resources and support to make this program a reality.

We invite you to be part of this journey.

Get Involved with Ashabhumi Nepal

Rural home stay or Volunteering with Ashabhumi offers a unique opportunity to immerse yourself in Nepali culture, make a meaningful impact on the community, and create lasting memories. Whether you're an individual, a group, or a corporate team looking to explore and give back, we invite you to join us.

By volunteering with us, you will engage in daily activities such as planting, harvesting, and working on agricultural projects that improve the livelihoods of local farmers and rural communities. Stay with us on our farm, where you will connect deeply with the community and nature. This experience will be transformative, leaving you with a lifelong appreciation for life and an understanding of how simple life can be and how little you need to survive.
